SUMMARY

Frontend and Shopify developer with 9 months of hands-on e-commerce experience at Fantech World and Teevolution. Skilled in editing Shopify Liquid templates, building custom page sections, and writing hand-crafted CSS to match specific design requirements, with working knowledge of JavaScript and Next.js. Experienced in SOP-based customer service. Multilingual (Indonesian, English, Mandarin — HSK 4). Seeking a Frontend or Shopify developer role; based in Medan, Indonesia and open to relocation.

SKILLS

Frontend: HTML5, CSS3, JavaScript, Next.js

Shopify / E-commerce: Shopify, Shopify Liquid, Theme Customization, Product Listing Management, Order Fulfillment

Backend / Tools: Next.js (Full-Stack), PHP, MySQL, Git, GitHub, AI-assisted Development

Other: Customer Support (Email), SOP Compliance, Attention to Detail, Self-directed Learning

EXPERIENCE

Web Commerce Intern (Shopify) — *Fantech World* Jul 2025 – Mar 2026

- Added and edited product listings on the company's Shopify storefront
- Built and added new custom sections to product pages using Shopify Liquid
- Edited and extended the overall website theme by writing and modifying Liquid template code
- Personalized page styling with hand-written CSS to match specific design and layout requirements

Customer Service & E-commerce Intern — *Teevolution (part of Fantech World)* Jul 2025 – Mar 2026

- Managed order export and fulfillment for the online store
- Contributed to adding new sections and features on product detail pages, in coordination with the Teevolution team
- Handled customer service inquiries via email, following the company's own detailed SOP
- Maintained consistent, SOP-compliant responses across customer communications

PROJECTS

AI-Integrated LMS (Thesis Project) — *github.com/DavisYJue/cloud-lms* Next.js, DeepSeek, RAG

- Designed and built an intelligent LMS that transforms a traditional LMS into an AI-assisted platform for both students and teachers
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using a locally-hosted DeepSeek model to answer questions grounded in teacher-uploaded materials and the LMS manual
- Built the full-stack application in Next.js, covering frontend and backend logic for both student and teacher roles
- Enabled students to get instant, source-grounded answers to course questions without waiting on a teacher's manual response

Hospital Database Management System — *github.com/DavisYJue/Hospital-Database* PHP, MySQL, XAMPP

- Built a simulated hospital management system covering patient and staff information, room management, and pharmacy inventory
- Designed and implemented the database structure and backend logic independently using PHP and MySQL
- Centralized patient, staff, room, and inventory data into one system to replace what would otherwise be scattered, manually-tracked records

LANGUAGES

Indonesian: Native | **English:** Professional Working (IELTS 6.5 Overall) | **Mandarin Chinese:** Intermediate (HSK 4)

EDUCATION

Bachelor of Engineering, Computer Science and Technology

South China University of Technology, Guangzhou, China

Graduated June 2026 | GPA: 3.43/4.00 (Average Score: 85.3/100)
